The old church housewas destroyed by fire or pulled downsome years ago, and a new and beautiful structure has taken its place. Mrs. Hopkins gave \$10,000 toward building it, and after it was completed had put in it alworant that cost the action of the it an organ that cost her \$25,000. It is church to say it is the finest organ in the country. Adjoining the church and connected with it by a pretty passageway, is the parsonage, which are ageway, is the parsonage, which Mrs. Hopkins built and furnished at a cost of 100,000. She also bought the graind upon which it stands at an expense of some \$14,000. Altogether, then, she has given the church about \$150,000. The parsonage is built of the same blue dolomite stone that is to go into her dolomite stone that is to go into her own private residence, and a more com-plete and fine ministerial residence there is not in all New England. It is a gem of architectural beauty, and it and the church together, side by side, on a level, grassy lawn, embowered by on a level, grassy lawn, embowered by the grandest old elms, make a charm-ing picture. THE ADMINISTRATION.

It Will Be Democratic All Over, but Will Make Haste Slowly.

IWashington special to Chicago Tribuna.]

A member of the Cabinet gives the following information as to the policy of the administration:

No sort of pressum can hurry the meding of changes. The several departments will be organized first by the placing of Pennorals in the responsible positions, but in this the good of the service will be kept in view that, of course, it is regarded as essential to have the places of responsibility and trust filled by men in political sympathy with the administration, but that this does not argue that every man in the departments field by a "position" which requires confirmation by the Semate is to be removed. There are positions which in order to be properly filled require a knowledge of details and familiarity with the duties, and to make sud lea changes would impair the efficiency of the public service. It will be the rate, however, to part Deincerats in the important places ultimately, but there will probably be a few exceptions where the present incombents will remain permanently.

In regard to the South, the revenue, one ently. In regard to the South, the revenue, cus-

inenty.

In regard to the South, the revenue, customs, and Department of Justice officials will be removed. They have all it is charged, been political workers. The New Orleans Custom House is pointed out as a sample of the existing state of entire in the South. It is charged that nearly every man in the service there has been put in by Kellogg and other. Republicans, as reward for political services.

This present calculation in administration circles is that the South will remain in session until the first of April. In a week the Demogratic brads of furieaus will be appointed and the subject of making appointments generally to fill vacancies and for the removal of such as one marked for largifier will be considered.

The policy of referring all matters of appointment to the head of the department under which the appointed and Attorney General Garland held that very large proportion of office-holders in the South onghit to go.

The minimum that will be Demogratic. There need be no doubt about that.

The idintipatation will be Democratic. There need be no doubt about that. There seems to be no feer in admini tration quarters of any collision with the Senate. Where removats may be deemed necessary the same course as that pursued by the Republicin Presidents will probably be followed. The removat may be deemed necessary the same course as that pursued by the Republicin Presidents will probably be followed. The removat inplican Senators in special cases, will not be sabmitted to the Seunte. Republican Senators have assured the President and members of his Cabinotte in the properties of the continuous continu sevemi Republican Schalors, who are en-arely willing to occupy pleasant relations with the administration. As any rate there is no apprehension at present that any difficulty will be encountered in procuring the confirmation of nominations.

Room for Immigration.

With advancing spring the railroad companies of the West are preparing for the immigration of 1885, which bids fair to assume enormous proportions: The question naturally arises in the aimle of those unacquainted with the country as to where so many people are to ind settlement. Years ago the atom was counted thus the available limits of the great West had been a reached, that the agricultural lands were about all taken, and that all that only as uncertain grazing grounds for only as uncertain grazing grounds for the venturesome herder and shepherd. But the settler has kept stendily en-croaching upon the boundaries of this yast region until he has finally pushed his corn and wheat fields into the very center of the mythical Great American Desert, exploding the theories of the explorer and spoiling the map of the

geography.
The Government lands of Dakota The Government lands of Dakota have been rapidle disappearing, until all of the free line senth of the forty-sixth parallel are for the most part confined to the counties of Campbell, McPherson, Walworth, Potton, and the recently opened Crow Creek Reservation. These comprise some of the finest and most productive lands to be found in the great valley of the Missouri, and the present season will no doubt see the entry of the last available acro in South Dakota, Iring east of the Missouri River. AND ALL MALABIAL DISEASES

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies were offered to the public for the SAPE, CERTAIN, SPEEDY and PERMANENT cure of Agen and Pewer, or Chills and Fever, whether of short or long standing. He refers to the antire Western and Bouthern quantry to herr him testimony to the trath of the assortion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a groat many cases a single dose has been sufficient for a cure, and whole families have been cured by a mingle bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain to cure, if its use is continued in simpler doses for a wook or two after the divesse has been chocked, more especially. Indisputt, and long-standing sease. Unreally-this medicine will not require any sid to keep the boweis in good order. Should the patient, however, require a sathertie medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VICETAILE FAMILY FILLS will be sufficient.
